

Nkosi

Frontend developer

About me

My professional experience as a Front End Developer for my previous company has smoothed my Javascript, React, Redux, CSS3, HTML5 and Node.Js skills, as well as my knowledge of mobile and responsive design. My experience includes writing code from scratch using Javascript library React, I've used react classes and react hooks and managing the state using Redux, also using flow and prettier to maintain clean readable code.

Skills & expertise

HTML5
CSS3

Javascript,
Nodejs

React and
Redux

My Work

SIGNUP PAGE

— — —

This is a simple one page site I did using HTML, Javascript, CSS and Bootstrap

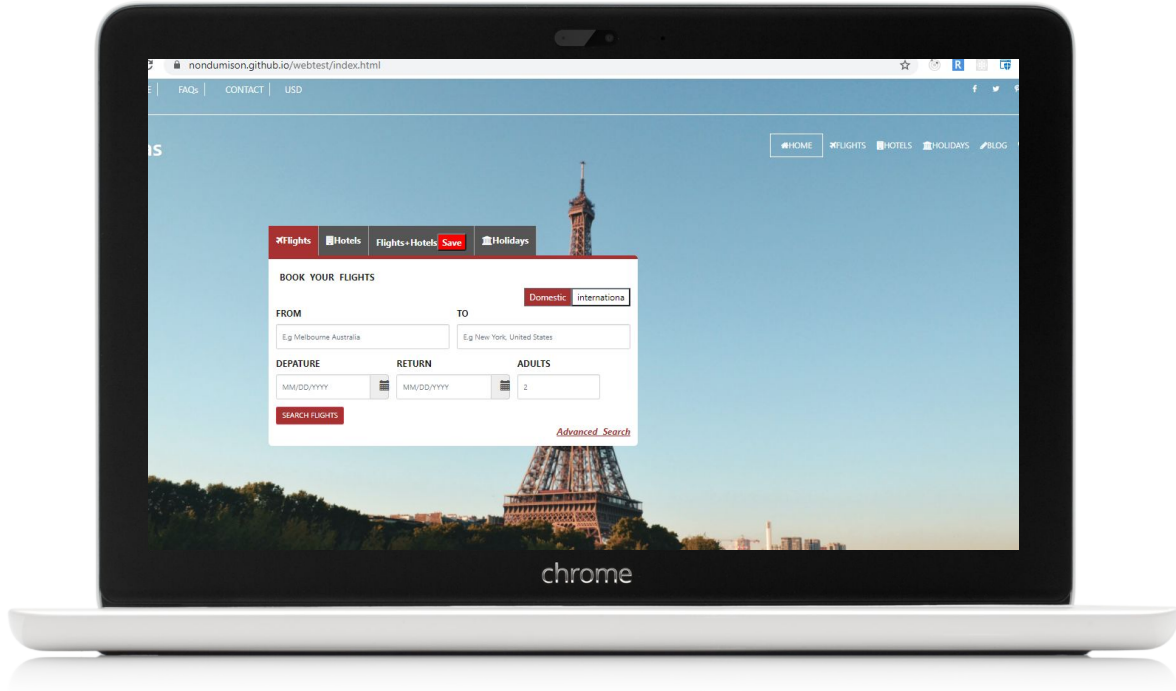

<https://nondumison.github.io/example/index.html>

BOOKING PAGE

— — —

This is a simple one page site I did using HTML, Javascript, CSS and Bootstrap

<https://nondumison.github.io/webtest/index.html>

STOKVEL APP

— — —

Stokvel app is a financial management tool for stokvels. Stokvels can chat to financial adviser and see transactions. It's still in progress I was working on it with my friends on a hackathon

<https://github.com/NondumisoN/akhanani>

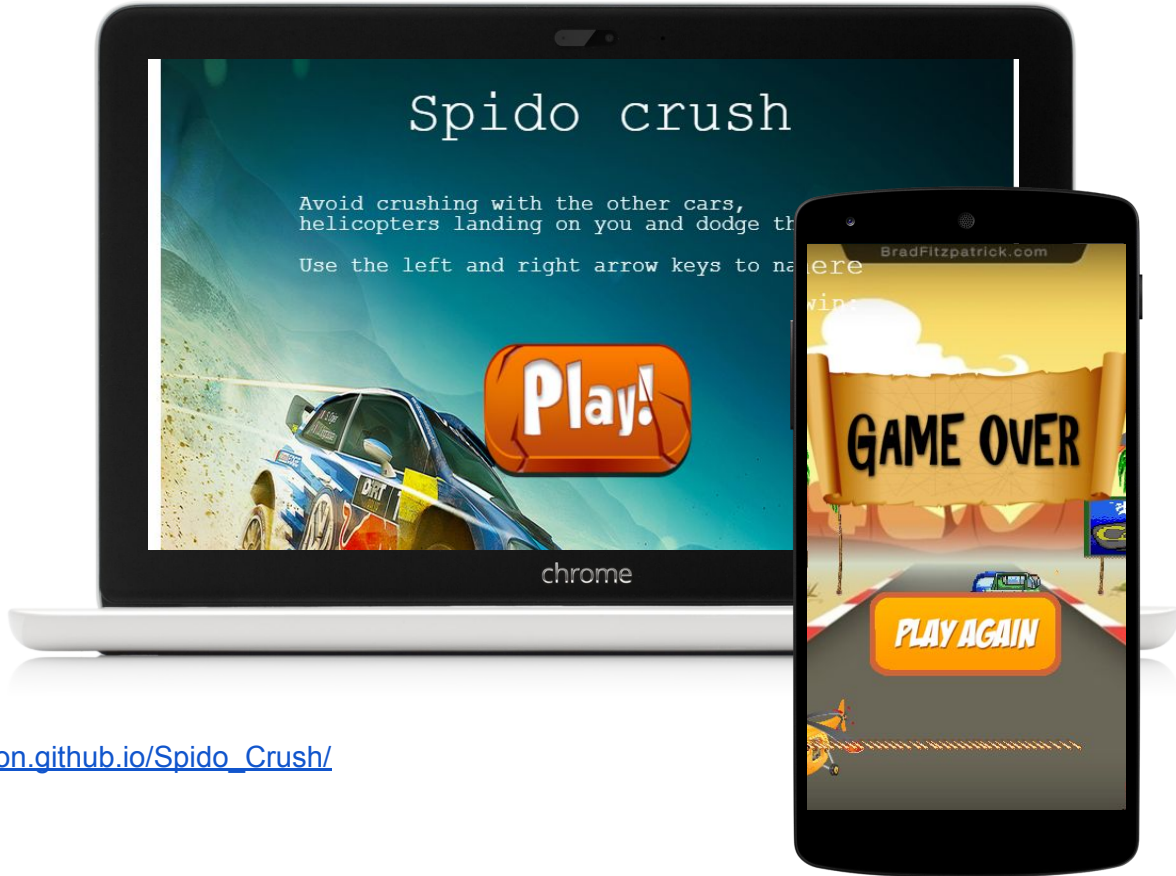

GAME

— — —
This is my the first game I developed.

It is a game where you should dodge the bullets and avoid the helicopter crushing over you .

I developed this game using HTML5 and Phaser3.
